

Black Box Tests

1.The application should be able to interface with the CLARIN project

Test Case	Input	Expected Output
Request document from CLARIN project that exists	Document Request	Requested Document
Reuquest document that does not exist from CLARIN project	Document Request	Alert message informing user that the document does not exit.

2.User should be able to turn all annotations “off” and “on”

Test Case	Input	Expected Output
Turn annotations from off to on	Toggle annotations	Annotations will be turned on
Turn annotations from on to off	Toggle annotations	Annotaions will be turned off

3.User will be provided with [DOCUMENTATION] (on web page)

Test Case	Input	Expected Output
User has access to Documentation	Select Documentation Option	User is provided with page(s) of documentation for the software

4.The web-application must be suitable for searching queries, browsing the XML documents, translations, interpretation and scanned pages for these user groups:

- secondary school children aged 11 years old or older;
- University and college students;
- researchers;
- The wider public with average computer skills, and who are aged 11 years or older

Test Case	Input	Expected Output
Secondary school children aged 11 years old or older can perform search using software	Search Criteria	Correct search results from users query
University and college students can perform search using software	Search Criteria	Correct search results from users query
Researchers can perform search using software	Search Criteria	Correct search results from users query
The wider public with average computer skills, and who are aged 11 years	Search Criteria	Correct search results from users query

or older can perform search using software		
--	--	--

5.The web-application must be accessible from Chrome version 50.+, Firefox version 45.+, Safari version 9.+ , Edge version 38.14393 and higher.

Test Case	Input	Expected Output
User can access web-app on Chrome version 50+	Load web-app using browser	Web-App is accessed from browser
User can access web-app on Firefox 45+	Load web-app using browser	Web-App is accessed from browser
User can access web-app on Safari Verison 9+	Load web-app using browser	Web-App is accessed from browser
User can access web-app on Edge Version 38.14393+	Load web-app using browser	Web-App is accessed from browser

6.It will be possible to extend the application such that translation and interpretation views can be added.

We are unable to Black box test this requirement as it requires knowledge of the code itself in order to test.
